

# E-PROJECT MANAGEMENT CERTIFICATION CURRICULUM

## fact sheet

### Self Paced PMP® Prep Course: e-PMCC

99.13% passed first time - learn on your schedule

#### Overview:

The Project Management Institute (PMI®) has created a rigorous certification process for Project Management Professionals (PMP®) which includes passing a demanding 200 question on-line examination. There is a massive amount of information to be absorbed and retained.

Since 1999, PCI Global has prepared thousands of Fortune 500 managers to pass the PMP® exam the first time. A five day class set in a fun game show format offers key content, interactive drills, and exercises with two practice quizzes per day. 99.13% of all candidates reported passing the first time.

In September 2005, PMI® upgraded the exam and PMBOK®, making qualifying and passing more difficult. PCI Global adapted it's course and on-line practice exam to reflect these changes.

#### E-Learning Version:

PCI Global, in partnership with VCAMPUS, adapted our instructor-led class into a self-paced internet deployed course available 24 X 7. Unlike other page turning e-books, e-PMCC has been designed with the same degree of interaction you'd find in an instructor-led class.

Organized into 12 modular blocks with 2-4 lessons in each module, each offers short bursts of content, followed by questions, exercises, drills and periodic quizzes, just like the classroom version, except you control the pace. Course Content Navigation links allow you to go quickly to any section, module or lesson and to repeat and skip as you wish. There is a glossary of key terms, worked examples of quiz questions, and the simplest navigation in e-learning history.

**Simulated people.** There are even 3 simulated teammates to help you learn faster. (1) **Professor** who teaches the materials you need to master, (2) **Fellow Student** who represents you and asks questions, (3) **Industry expert** for real world applications.

#### Features:

- Complete content from latest edition PMBOK® with preparation for the current PMP® examination
- Virtual classroom feel with a professor who teaches core content, fellow student (who asks the questions that you need answers to, and an industry expert who provides real world application of the content
- Clean, bright screens and intuitive navigation with just 5 buttons to click
- Interactive navigational links that permit you to quickly move to any lesson in any domain and to skip or repeat any content; when you want!
- Provides required 35 contact hours of education upon completion
- PMI® reviewed and approved
- Click-and-Drag Drills, exercises, and on-line quizzes at the end of each domain with *immediate feedback on results*
- (Optional) Fullblown 200 question on-line practice exam that replicates the real thing with *immedidate feedback on results*
- *Tested on actual PMP® candidates before release*
- *Available as stand alone or built into blended solution with a class*

Length: Self Paced  
PDU Credits: 40
