The COMPLETE Project Management Certification Curriculum

Some Project Managers want professional recognition for their experience, ability and skills. Some companies have developed their own Project Management Certification and performance evaluation program; others rely on the Project Management Institute (PMI®). Obtaining PMP® certification has become increasingly important in today's marketplace; driving the need for faster and better learning.

The Project Management Institute (PMI®) is the recognized global authority identifying and charting the processes and knowledge necessary to build professional project managers. They have also written the official text called "A Guide to the Project Management Body of Knowledge" (PMBOK®). **To achieve professional recognition requires passing a tough 200 question examination in all nine PMBOK® knowledge areas. Those who pass are certified Project Management Professionals (PMP®).** PMI® select training vendors to become Registered Education Providers (REP).

PCI's Complete PMP Preparation, Training and Testing Curriculum

PCI Global provides this entire integrated package of screening, learning, testing options to pass the first time.

The Package Consists of:

- **20 question on-line screening exam** to ensure readiness to perform in PMP prep classes.
- **Four 1- hour web deployed courses** teaching basic, tools, techniques, terms and definitions required to ensure readiness to master PMP® content.
- **Five days of class** complete with instruction, drills, exercises, 2 daily quizzes with immediate feedback, and organized study groups; all in a fun game show format.

- *Support for all PMI chapters who run weekly prep classes with*
 - (a) *With 5-day crash course*
 - (b) *E-learning package*
 - (c) *One day Test review class*
 - (d) *On-line PMP® practice test.*

Results

99% of PCI participants that take the exam pass the **first time!**

All items above available as an integrated package or to be ordered a la carte.

Customized internal certification programs also available.

The Curriculum

Here are all the components of the complete Project Management Certification Curriculum, for the latest version of PMBOK® and the PMP examination.

1. Screening Quiz

Objective: 20 Question on-line examination that takes 10 minutes with immediate scoring. Screens for basic knowledge project management tools techniques, terms, and definitions. Ensures readiness for class; prevents slowing down more prepared students.

2. Web Deployed Basic Courses (Optional)

Objective: Four web deployed One-Hour course that quickly and interactively cover the basic project management tools, techniques and terms needed for mastery of PMP prep content. Each unit concludes with a practice quiz and immediate feedback.

3. Project Manager Framework and Integration *(Length 1 day, PDU Credit: 8)*

Objective: This module reviews the entire curriculum, objectives, student materials, tools & techniques certification requirements, applications, and test design. Framework outlines the study of Project Management and then discusses General Manager Skills, Project Phases, Life Cycle, Stakeholders and Organizational Influence. Integration Management covers planning and integrated change control processes to ensure all elements of the project are coordinated.

4. Scope and Time Management *(Length 1 day, PDU Credits: 8)*

Objective: Scope Management teaches the processes to ensure the project includes all the work and only the work required to complete the project consisting of initiation, scope planning and definition, scope verification and change control. Time Management teaches processes to ensure timely completion of the project. It consists of activity definition, sequencing, duration, estimating, schedule development and schedule control.

5. Cost and Quality Management *(Length 1 day, PDU Credits: 8)*

Objective: Cost Management teaches processes to ensure the project is completed within the approved budget through resource planning, cost estimating, budgeting and cost control. Quality Management teaches processes to ensure the project will satisfy the needs for which it was undertaken through quality planning, quality assurance and control.

6. Human Resources and Communications *(Length 1 day, PDU Credits: 8)*

Objective: Human Resource Management teaches processes to optimize the use of people on the project through organizational planning, staff acquisition, team development and training. Communications Management teaches processes to ensure timely and appropriate generation, collection, dissemination, storage and final disposition of project information.

7. Risk Management and Procurement *(Length 1 day, PDU Credits: 8)*

Objective: Risk Management teaches processes for identifying, analyzing and responding to project risk such as: risk identification, quantification, response development and response control. Procurement Management teaches processes to acquire goods and services from outside vendors and contractors. The skills required are procurement planning, solicitation planning, solicitation, source selection, contract administration and contract closeout.

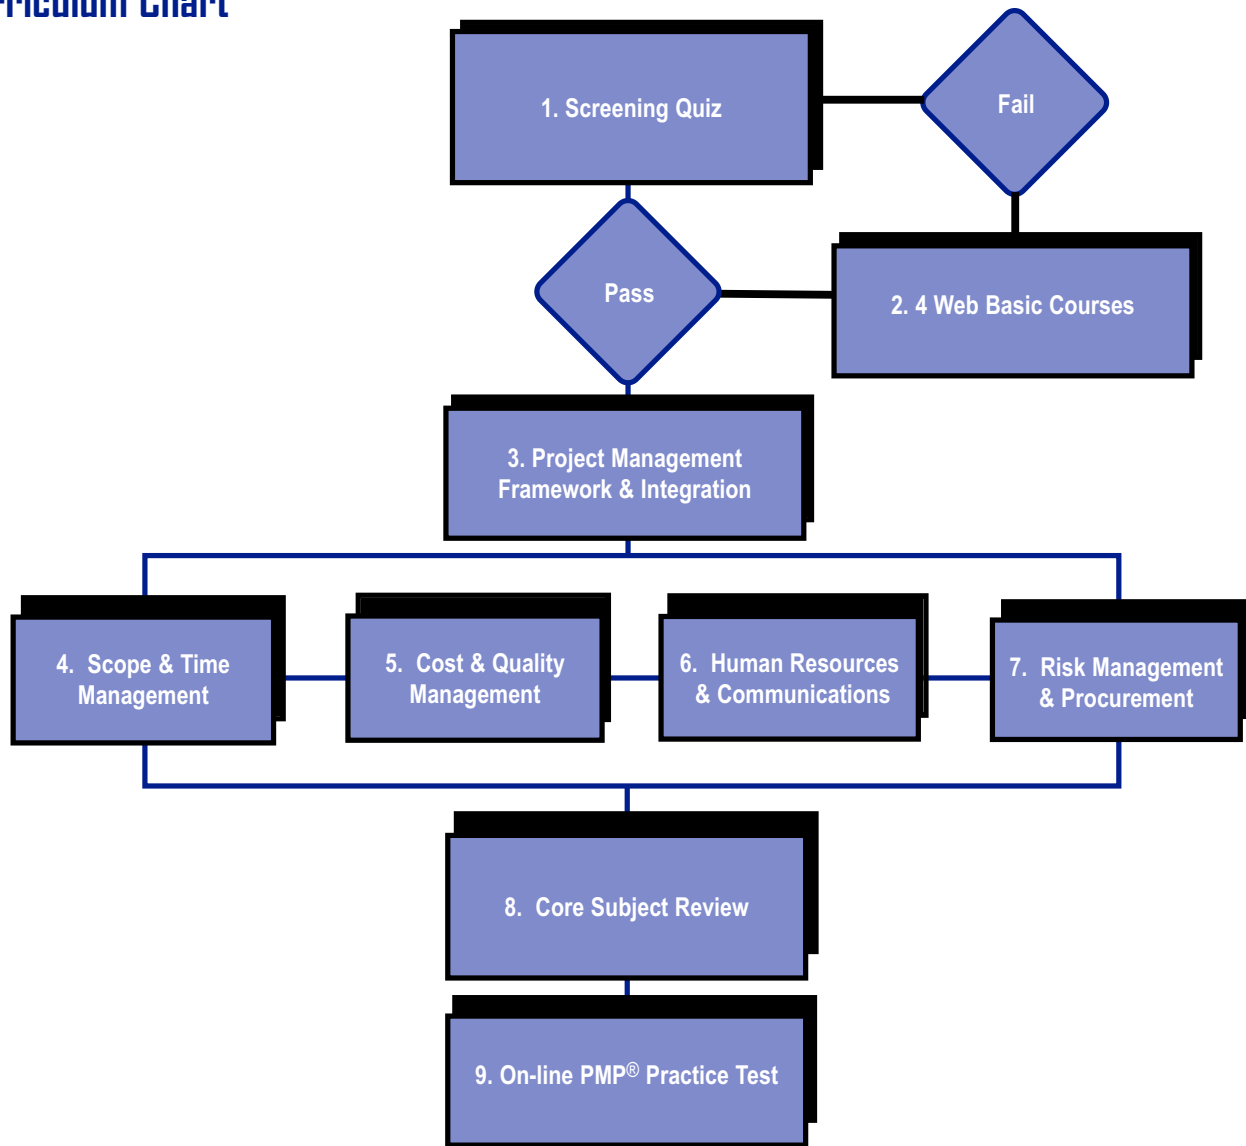

8. Core Subject Review and Test Preparation (optional) *(Length 1 day, PDU Credits: 8)*

Objective: One day class includes a review, drills, and quiz questions on all 9 PMP knowledge areas; in depth understanding of the PMP® exam format and requirements to maintain PMP® status.

9. Online PMP Practice Exam

Objective: Replica of current PMP® exam on-line in four hours with immediate test scores and feedback on results in all domains. Available in 3 formats: (1) One shot practice test – 4 hours (2) One week – test and re-test (3) One month – test one domain – get immediate feed back on scores and errors. Try other domains and re-take the complete practice PMP® test as many times as you wish.

Curriculum Chart

Additional Learning Opportunities:

“Foundations of Project Management”

Computer simulation starter course to precede the entire PMP curriculum. Teaches all basic tools and technique, terms and definitions in an exciting interactive format built around a computer simulation of a basic project. Compresses 4 months of project life cycle in 2 real time days – with immediate feedback on results – so people learn from the consequences of their own decisions. Includes electronic basic tool-kit.

“Project Leadership Course – Advanced”

Computer simulation course to tie together, integrate and apply all skills, techniques, tools and concepts learned in the entire Prep curriculum. Simulates complex technology project; even *simulates people*; some effective – some not. Compresses 6 months of project life cycle into 3 real time days with *immediate feedback on results*. Includes complete electronic tool-kit to apply successfully on next project.

PCI Global Inc. and PMI®

PCI Global is a Global Charter REP (Registered Education Provider) for the Project Management Institute teaching project management to Fortune 500 companies in the USA, UK, Europe, Latin America and Asia since 1991.
